Product Overview

Our AGV integrated logistics system redefines industrial automation with precision-engineered solutions for complex production environments. Combining ISO-certified navigation technologies and ruggedized designs, this system delivers unparalleled efficiency for construction machinery, mining equipment, and wind turbine component logistics.

Equipped with LiDAR SLAM and 5G connectivity for real-time obstacle avoidance

Up to 50-ton bearing capacity with ± 1 mm positioning accuracy, ideal for engine block/boom structure transport

Combines inertial guidance, vision recognition, and electromagnetic tracking for hybrid workshop-floor adaptability
